```
#include <stdio.h>
#include <stdlib.h>
int main() {
  int n, new_number;
  scanf("%d", &n);
  int *p_numbers = (int *)malloc(n * sizeof(int));
  int i = 0;
  while (i < n) {
    scanf("%d", &new_number);
    *(p_numbers + i) = new_number;
i++;
}
  while (i >= 1) {
    printf("%d ", *(p_numbers + --i));
  }
  free(p_numbers);
  return 0;
}
```
